

FREE AI AGENT IDEATION WORKSHOP

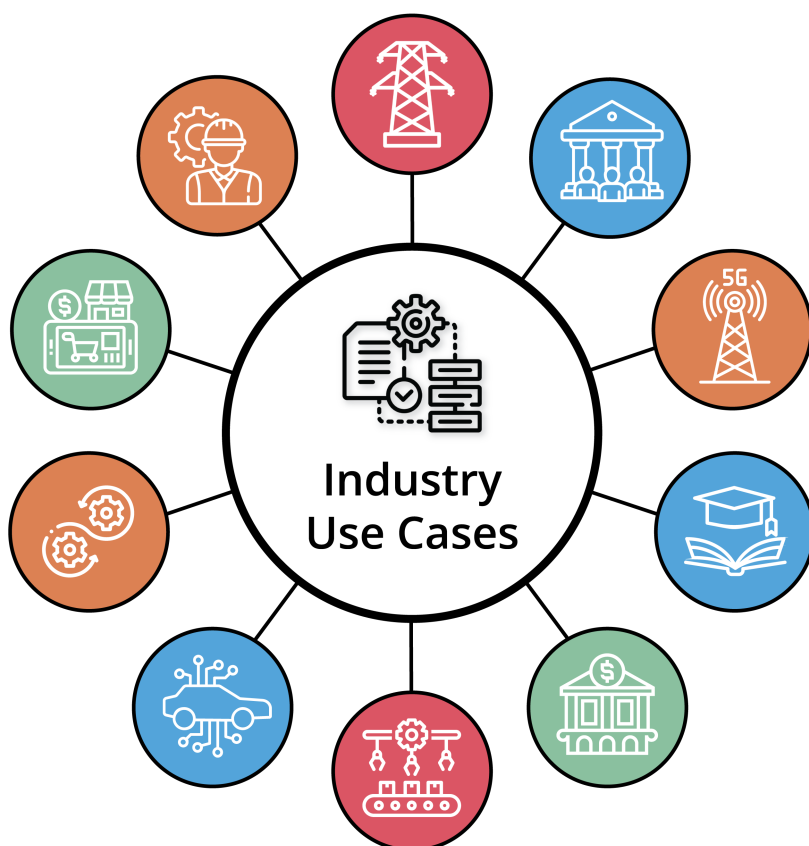

A free ideation workshop to help you identify, qualify and select business use cases where meaningful AI Agents can help you deliver real business value.

Use Case **A.Ideation™**

Knowing which business use cases to select as a candidate for agentic automation is not always a simple task. We all want meaningful AI working for us in our businesses, automating decision making and driving autonomous enterprise workflows. However, selecting the most valuable use cases for augmentation with AI Agents, understanding the value they can release and building these into a pipeline of actionable development requires some consideration.

At Synapsewerx, we have a proven, structured approach to AI use case ideation with our free half day Meaningful AI Workshop. We will fuel the imagination of your business and IT teams as we facilitate a 1/2 day **A.Ideation™ workshop**, helping you to identify real world business use cases that have the potential to bring meaningful value to your business.

- Predictive Maintenance
- Anomaly Detection
- Fraud Detection
- Customer Support
- Network Optimisation
- Hyper Personalisation
- Demand Forecasting
- Object recognition
- Quality Control
- Logistics Optimisation
- Predictive Ranking
- Targeted Marketing
- Workflow Automation
- DevOps Support
- Coding and Development
- Facial Recognition
- Resource Scheduling

We have a wide range of industry focused use cases that we can use to help accelerate your ideation session. Alternatively, you may have a number of ideas that you want to explore in more detail. We will work with you to explore your ideas and help you understand the practicality of implementing AI in your business.

SWX AI Agent Blueprints

Our team of AI Engineers and Data Scientists have packaged up our repeatable AI design patterns into an accessible catalogue of AI Blueprints. **The Synapsewerx AI Blueprints™** help us align the correct type of AI Agents to your candidate business use cases. Our team can then advise you about the complexity of agentic AI for your business and the likely value you can release from your AI investments over time.

Generative AI

Multimodal Models

Computer Vision

Natural Language

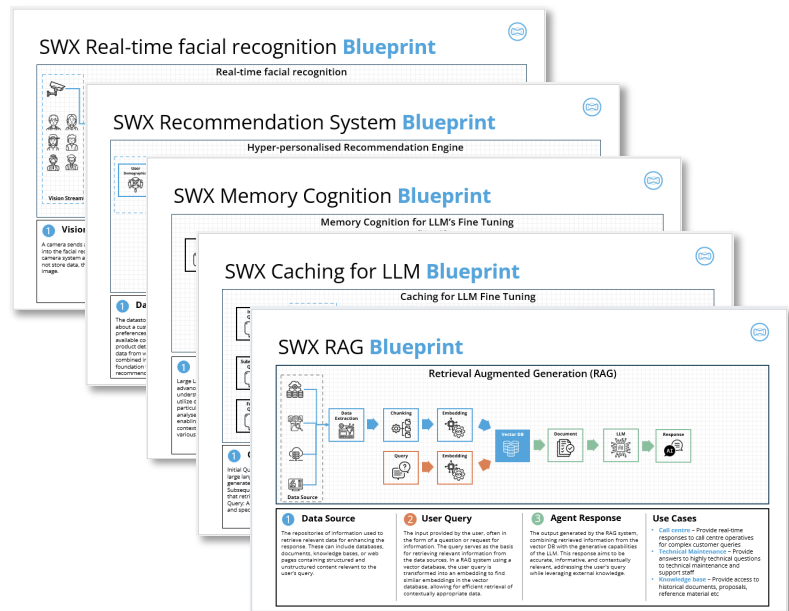

Machine Learning

Deep Learning

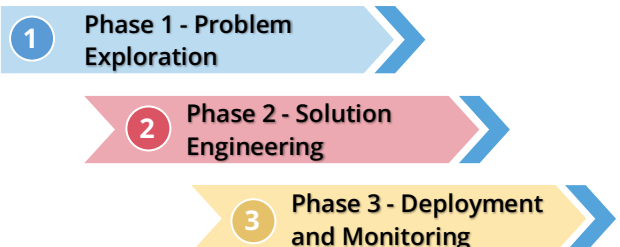

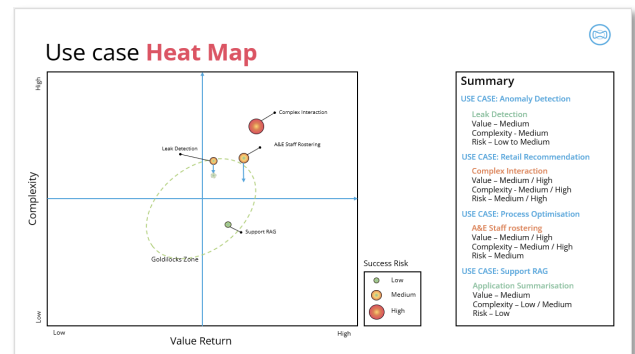

Statistical Modelling

The FREE Workshop

- The context of **Agentic AI** in our businesses today and in the near future
- A definition of a **common language and terminology** for AI Agent technology
- **A facilitated AI Agent use case ideation workshop** with business and IT leaders
- **A structured approach** to the identification of the right candidate use cases for AI Agent development
- **A pipeline of candidate AI Agents**, aligned to valuable business use cases
- **A practical implementation roadmap** for operational implementation and continuous value realisation
