

# ARTIFICIAL INTELLIGENCE, DATA & INTEGRATION

We are Synapsewerx, where innovative thought leadership meets software engineering expertise; a dynamic technology team deeply passionate about the future of intelligent change.

01010011

## Our Vision

We believe that all contemporary organisations will use Artificial Intelligence in the form of AI Agents that will make autonomous, real-time, intelligent decisions. At Synapsewerx, we help organisations realise this vision, by providing the thought leadership, the solution engineering and the practical implementation expertise needed to make business dreams reality.

### AI / ML Intelligence

Deep traditional neural network, data science, ML Modelling and GenAI expertise.

### Data, BI & Analytics

Democratising access to high quality data through data-led reference architecture.

### Data-led Integration

Connecting applications and enabling high quality, real-time data for business operations.

## Independent Experts

We specialise in technologies that are best of breed and heavily invested in AI innovations. Working with a range of complementary technology partners we believe in leveraging an organisations investment in its enterprise technologies, supplementing this with new innovations as and when needed.

### Agentic Solutions

We design, build, test and deploy custom AI Agents using ML language models combined with your proprietary data and preferred AI pipeline vendors.

### Data-led Architecture

We believe every organisation needs ownership of it's proprietary, high quality operational data in the form of a real-time medallion data hub.

### Real-time Integration

Data currency and quality are the key considerations when we design and build the interfaces needed to support autonomous AI Agent decision making.

# Professional Services

Our professional services team are 100% certified in the technologies of our vendor partners, providing you with the quality consulting services you need to successfully deliver your projects.

## Thought Leadership & Strategy

Our practice directors combine their hands-on expertise with the latest training and industry insights, providing you with the practical advice, guidance and support you need to curate your business and technology strategies.

## Solution Architecture & Design

Realise your business vision through a considered and practical solution architecture. Rest assured by a design based on the deep vendor-specific technology expertise of our 100% certified senior architects and solution engineers.

## Development & Implementation

Let us take your solution design from concept to reality as we build you a robust, scalable solution and implement it within your operational environment using established CI/CD tools and processes.

## DevOps & Managed Support

We offer a range of dedicated managed support services for our partner technologies, providing you with proactive, 24/7 support, for up to 365 days of the year. Giving you the technical support you need, when you need it the most.

## Continuous Innovation

At Synapsewerx we're constantly training in the latest vendor software releases, product updates, industry news and best practices. We bring these insights to you, so that you can be ready for tomorrows future.
